PREMIUM SALES PAGE BLUEPRINT

A clear, credible landing page for the AI Digital Business Launch Kit

FIELD GUIDE / WORKBOOK / IMPLEMENTATION SYSTEM

A practical system for building, validating and selling a digital product.

Positioning Sell a practical implementation system—not a promise of instant income.

Hero section

Headline: Build and launch your first digital product—with a clear Hindi step-by-step system

Subheadline: A practical toolkit with a launch playbook, editable business templates, 100 structured AI prompts, a 30-day planner and a pricing calculator.

Primary CTA: Explore everything included

Secondary CTA: Preview sample pages

Problem framing

An idea is only the beginning. Many beginners get stuck deciding what to sell, how to structure the files, what to charge, how to write a sales page and how to deliver the product reliably. This kit organizes those decisions into a repeatable process.

What is included

Asset	What it helps you do
Premium Playbook	Follow a research-to-launch operating process
Implementation Workbook	Fill in customer, offer, QA and launch decisions
100 AI Prompts	Draft and review work with clearer instructions
Landing Page Copy Kit	Structure the offer and answer common buyer questions
30-Day Planner	Turn the plan into small daily tasks
Pricing Calculator	Model assumptions, fees, refunds and marketing costs

How it works

1. Choose one audience and validate a real problem.
2. Use the playbook and workbook to define a small product.
3. Build and review the deliverables using the prompts and QA controls.
4. Use the calculator to model price and costs.
5. Set up checkout and delivery, then run a soft launch.

6. Review customer feedback and improve the next version.

Who it is for

- Beginners creating their first eBook, worksheet or template pack.
- Freelancers and creators packaging their knowledge into a digital asset.
- Small businesses standardizing repeatable workflows with checklists and templates.

Who it is not for

- People expecting guaranteed sales or instant income.
- Buyers who want custom software or done-for-you agency services.
- Anyone unwilling to review AI output and test the files before use.

Suggested price presentation

Price test ₹999 — proposed test price. Confirm taxes, exact file formats, delivery, update policy and refund terms before publishing the offer.

FAQ copy

Will this guarantee income?

No. This is an educational toolkit. Outcomes depend on audience, execution, market conditions and effort.

Do I need coding skills?

Not to use the core worksheets and guide. Website, payment and automation setup may require separate tools or technical help.

What exactly do I receive?

List the six exact files and formats shown on this page. Do not advertise bonuses that are not included.

Can I edit the files?

The kit includes editable DOCX and XLSX files. Compatibility depends on the software you use.

What is the refund policy?

Insert your actual policy here and show it before payment. Do not publish a policy you cannot honour.

Is this a ready-made website?

No. It includes landing-page copy and planning tools, not a hosted website, payment account or done-for-you setup.

Trust checklist before publishing

- Use a real product preview and real sample files.
- Show exact price, taxes, delivery method and refund terms before checkout.
- Do not fabricate testimonials, ratings, customer counts or countdown timers.
- Add privacy notice, support contact and business details.
- Test the mobile layout and full payment-to-delivery journey.
