AI PROMPT LIBRARY • PREMIUM EDITION

100 PROMPTS FOR PRODUCT BUILDERS

Structured prompts for research, creation, launch and operations

FIELD GUIDE / WORKBOOK / IMPLEMENTATION SYSTEM

A practical system for building, validating and selling a digital product.

Use the prompts as working briefs, not as a substitute for judgment. Replace every [placeholder], remove confidential information, and verify factual or regulated claims before publishing.

Prompt formula Context + specific task + constraints + output format + quality criteria + human review.

Research & validation

Prompt 001

Build a research plan for [audience] facing [problem]. Separate known facts from hypotheses, suggest 8 interview questions, and state what evidence would weaken the idea.

Prompt 002

Generate 12 digital product concepts for [audience]. Score each for urgency, reachability, digital delivery fit and validation cost; explain uncertainty rather than inventing market data.

Prompt 003

Analyze these anonymized interview notes [notes]. Cluster repeated pain points, preserve exact customer language where useful, and distinguish evidence from inference.

Prompt 004

Challenge my product idea [idea]. List hidden assumptions, plausible failure reasons, and the cheapest test for each assumption.

Prompt 005

Design a 7-day validation experiment for [offer]. Define audience, channel, CTA, metrics, guardrails and decision rule.

Prompt 006

Create a competitor research matrix for [category] with columns for audience, promise, format, visible price, evidence and differentiation; do not fabricate findings.

Prompt 007

Write 10 neutral interview questions that reveal current behavior instead of leading the customer toward my idea.

Prompt 008

Turn [problem] into three narrower product opportunities with a clearly defined job-to-be-done and deliverable.

Prompt 009

Suggest a free sample that is genuinely useful while demonstrating the quality and approach of [product].

Prompt 010

Review this value proposition [copy]. Identify vague terms, unsupported claims and missing customer context.

Product architecture & writing

Prompt 011

Create a detailed table of contents for [product] for [audience], including learning objective, example, action step and likely confusion for every chapter.

Prompt 012

Write a section explaining [topic] in simple Hindi, then add a realistic example, a checklist and a limitations note.

Prompt 013

Transform this draft [text] into a clear instructional sequence. Preserve meaning, remove repetition and flag factual claims needing verification.

Prompt 014

Create a glossary of [terms] for beginners, with one-sentence definitions and plain examples.

Prompt 015

Build a worked example for [workflow] with inputs, steps, output, review criteria and common failure modes; label fictional assumptions.

Prompt 016

Create five knowledge-check questions for [chapter], with answer key and a brief explanation for each answer.

Prompt 017

Audit this chapter for unsupported claims, overpromises, missing prerequisites and steps that cannot be reproduced.

Prompt 018

Write a quick-start page that tells a buyer what to open first, what to prepare, and how to get the first small win.

Prompt 019

Create a scope and exclusions page so buyers understand exactly what the product does and does not include.

Prompt 020

Produce a final editorial checklist for consistency, readability, links, sources, formatting and mobile use.

Templates & operations

Prompt 021

Design an editable worksheet for [goal] with field labels, instructions, one completed example and a review checklist.

Prompt 022

Create a project tracker for [launch] with task, owner, due date, dependency, status and evidence of completion.

Prompt 023

Build a standard operating procedure for [repeatable task] with trigger, prerequisites, steps, exception handling and sign-off.

Prompt 024

Create a decision matrix comparing [options] using criteria [criteria], weighted scores and notes on uncertainty.

Prompt 025

Design a customer interview sheet that minimizes personal data collection and records consent for follow-up.

Prompt 026

Create a quality assurance rubric for [deliverable] scored 1–5 with objective anchors for each score.

Prompt 027

Create a version control and release note template for a digital product, including known limitations and update instructions.

Prompt 028

Build a support triage table for download issues, payment questions, refund requests and suspected security incidents.

Prompt 029

Design a weekly review worksheet that links metrics to decisions, not just reporting.

Prompt 030

Create an asset register to track creator, license, commercial permissions, attribution and proof of license.

AI workflow design

Prompt 031

Design an AI-assisted workflow for [task] with inputs, steps, expected output, human checkpoints, privacy risks and fallback path.

Prompt 032

Improve this prompt [prompt] using role, context, task, constraints, examples and output format; explain the important changes.

Prompt 033

Identify which steps of [workflow] should remain human-reviewed and why, especially high-impact or public-facing decisions.

Prompt 034

Create a reusable prompt template for [task] with placeholders and a quality rubric.

Prompt 035

Create a factual verification workflow for AI-generated text, including source checks and unsupported-claim handling.

Prompt 036

Compare manual, spreadsheet and AI-assisted approaches to [task] on cost, reliability, privacy and maintenance burden.

Prompt 037

Map failure modes for [AI workflow], likelihood and impact, and proportionate mitigations.

Prompt 038

Create a minimum-data plan for [use case]; specify which data is unnecessary and should not be entered.

Prompt 039

Evaluate this AI output [output] against accuracy, completeness, clarity, bias, privacy and usefulness.

Prompt 040

Design a human approval checklist before AI-generated content is published or sent to customers.

Marketing & positioning

Prompt 041

Write 12 headline options for [product] aimed at [audience], each specific and realistic, with no guaranteed outcomes.

Prompt 042

Create a landing page hero with audience, problem, mechanism, deliverables and a single clear CTA.

Prompt 043

Turn these product features [features] into benefits while stating limitations and avoiding unsupported claims.

Prompt 044

Create five educational social posts for [audience], each with a practical tip and a low-pressure CTA.

Prompt 045

Write a 30-second video script with hook, demonstration, takeaway and next step; avoid fake urgency.

Prompt 046

Create a 7-day content calendar balancing education, product demonstration, proof and offer information.

Prompt 047

Rewrite this copy [copy] to improve clarity and trust; identify manipulative or ambiguous phrases.

Prompt 048

Write a launch announcement that lists exact deliverables, compatibility, boundaries, price and support route.

Prompt 049

Create a lead magnet outline that solves one narrow problem and naturally connects to [paid product].

Prompt 050

Generate FAQ answers for price, delivery, format, fit, exclusions, refunds and support; use placeholders where policy is not yet set.

Checkout & delivery

Prompt 051

Create a checkout QA checklist covering price, tax display, payment success/failure, duplicate payment, receipts and mobile layout.

Prompt 052

Write a transparent order-bump description for [related asset], including its separate price and clear opt-in choice.

Prompt 053

Design an ethical upsell offer that adds distinct value, states the full price and lets the customer decline easily.

Prompt 054

Explain a high-level secure payment-to-delivery flow using verified provider confirmation; never expose secret keys.

Prompt 055

Write a delivery email with a secure access link, first step, file list and support contact.

Prompt 056

List negative test cases for a digital download checkout, including expired link and wrong email.

Prompt 057

Draft a plain-language refund policy outline with placeholders and a reminder to check applicable law.

Prompt 058

Design a support process for payment mismatch without collecting card numbers, passwords or OTPs.

Prompt 059

Create a mobile checkout friction audit focused on form length, clarity, trust and error recovery.

Prompt 060

Review this delivery process [process] for accidental public links, duplicate fulfillment and access-control gaps.

Pricing & analytics

Prompt 061

Create a price-testing hypothesis for [product] and audience [audience]. Define metrics and avoid claiming a universal market price.

Prompt 062

Calculate unit economics from [price, tax treatment, fees, variable costs, refunds, marketing spend]; state assumptions and missing inputs.

Prompt 063

Analyze this anonymized sales dataset [data] for conversion, average order value, refund rate and acquisition cost; do not infer causality from small samples.

Prompt 064

Build a break-even model for [offer] with fixed costs, variable costs, taxes and refunds separated.

Prompt 065

Suggest a dashboard that separates activity metrics from decision metrics for a small digital product.

Prompt 066

Design an A/B test that changes one major variable, defines a primary metric and guards against premature conclusions.

Prompt 067

Diagnose low sales by considering traffic quality, problem/offer fit, page clarity, trust, price and checkout failure.

Prompt 068

Create a refund root-cause analysis that groups reasons and proposes product improvements.

Prompt 069

Explain what cannot be concluded from this data [data], including sample size, attribution and selection bias.

Prompt 070

Create a weekly business review template with one decision and one experiment based on the data.

Customer success & support

Prompt 071

Write a calm, concise response to this customer issue [issue], acknowledging the problem and giving one clear next step.

Prompt 072

Create a troubleshooting guide for a digital file that will not download, open or display correctly.

Prompt 073

Design a first-10-minutes onboarding sequence for [product] to help the customer use the most valuable asset first.

Prompt 074

Create a feedback interview guide that identifies confusing instructions and missing assets without pressuring the buyer.

Prompt 075

Write a refund response that follows this actual policy [policy] and avoids arguing or making unsupported legal claims.

Prompt 076

Build a customer support escalation matrix for delivery, billing, privacy and security issues.

Prompt 077

Turn these support tickets [tickets] into anonymized product improvements and recurring FAQ topics.

Prompt 078

Write a transparent limitation notice for [product] that explains prerequisites and what is not included.

Prompt 079

Create an update announcement describing version changes, who benefits and how to access the update.

Prompt 080

Design a customer success checklist for the first seven days after purchase.

Privacy, IP & security

Prompt 081

Create a data inventory for this workflow [workflow], listing fields, purpose, access, retention and deletion method.

Prompt 082

Build a checklist for removing or anonymizing personal data before using AI tools.

Prompt 083

Create a commercial-use license verification checklist for fonts, images, templates and third-party text.

Prompt 084

Create an account security checklist for a small digital business covering MFA, password manager, least privilege and backups.

Prompt 085

Threat-model this download flow [flow] at a high level; identify abuse cases and proportionate mitigations.

Prompt 086

Outline a privacy notice covering data collected, purpose, retention, sharing and contact; flag items needing legal review.

Prompt 087

Audit this sales page [copy] for fake testimonials, invented counts, guaranteed income and misleading scarcity.

Prompt 088

Compare expiring links, authenticated downloads and rate limits for [product] including usability trade-offs.

Prompt 089

Create an incident checklist for an accidentally public customer file or download link.

Prompt 090

Review this AI-generated content [content] for invented sources, copied phrasing, confidential data and factual errors.

Launch & iteration

Prompt 091

Review my launch plan [plan] for missing dependencies, risks, unrealistic deadlines and unclear owners.

Prompt 092

Create a 30-day launch schedule with weekly outcomes, daily 30–60 minute tasks and evidence of completion.

Prompt 093

Design a soft-launch protocol for a small relevant audience, including feedback consent and refund monitoring.

Prompt 094

Create a release checklist for file names, versions, links, formulas, accessibility and backup.

Prompt 095

Build a post-launch retrospective that separates expected results from observed evidence.

Prompt 096

Create questions for the first ten customers to learn about usefulness, friction and missing deliverables.

Prompt 097

Plan a version 1.1 release from this feedback [feedback], prioritizing high-impact and recurring issues.

Prompt 098

Use these metrics [metrics] to propose three next experiments; label assumptions and do not promise outcomes.

Prompt 099

Create a low-budget marketing plan using helpful content, relevant communities and permission-based outreach.

Prompt 100

Design a weekly operating routine for a one-person digital product business, including customer support and QA.
